ning about 40 miles north of Mouat St. Elias; thence nearly southeast across the British Possessions, skirting the north side of British Columbia, and enter the United States in longitude 30 degrees 40 minutes; thence across the northeastern corner of Montana Territory, and through the middle of its eastern border, diagonally across bakota Territory, passing about 35 miles northeast of Yankton; it crosses the Missouri in latitude 45 degrees 20 minutes, into Minuesota, and runs across the southwestern part of that State, leaving it at the junction of the Big Sloux and the luyan Reakah Rivers, and crosses the Missouri at its junction with the northwestern corner of Sloux county, Jowa; thence diagonally across that State to the Mississippi near Fort Madison, at shade of colored glass placed before the

centing note of her orbit. Under these favorable circumstances, it was hoped that the revelations to be made by the spectroscope and the lunar photograph would furnish some decisive evidence touching the form and composition of our central luminary, since it is only dur-

head of the French expedition, reported head of the French expedition, reported that a spectroscopic examination of the prominences showed them to be gaseous emanations—in fact, veritable flames—and not, as many had previously supposed, masses of condensed vapors resembling terrestial clouds. It will be the aim of observers to test the accuracy of this conclusion, and by the res of the accuracy of the spectroscope, during the Liames—and not, as many had previously supposed, masses of condeased vapors resembling terrestial clouds.

It will be the sim of observers to test the accuracy of this conclusion, and by the use of the spectroscope, during the brief interval of totality, to search for those peculiar lines in the spectrum which indicate the presence of elementary substances identical with some of those found on the earth. It is fortunate for the cause of Solence that appearances so evanescent as those presented during the priod of total observation may be copied and preserved by means of the photograph. Should lunar pictures be taken at each of the stations mentioned, a comparison of them will enable the scientist to satisfie the question as to the changes of form which these remarkable prominences and projections may undergo during a given time. It is not improbable that the actinic force from the corona and solar emanations may reveal, in pictures, the presence of matter which could not be detected by the human eye.

the question as to the changes of form which these remarkable prominences and projections may undergo during a given time. It is not improbable that the actinic force from the corona and solar emanations may reveal, in pictures, the presence of matter which could not be detected by the human ave.

—The professor of Hanover College at Madison, Ind., and amateurs of that place, have made extensive prepara-tions to take astronomical observations of the eclipse to-day.

New York, next alonday.

—A terrible fight occurred in New York on Thursday, between two seamen of the steamehip City of Limerick, named Richard Braurer and R. Backus, Brurer was thrown overboard and drowned. Backus was arrested.

—John H. Pratt, the ringleader of the Jefferson, Texas, riots, was arrested in New York on Thursday evening, by adejective from the headquarters of Gen. Reynolds, who has been on his track since April last. He was committed to the Ludlow street jail.

wher regards the recognition of cook by Peru as ill-advised, though spirited. In spite of all predictions the Cuban insurgents seem able to hold their ground. The whispers of the cession of Cuba to the United States are now louder than ever. The Americans have desired to come into possession of that island for the past twenty years. Now the obstacle of slavery having been solved, if a fair purchase can be effected, all parties may be satisfied with the arrangement, which will give another State to the Union and remove the great perplexity from the arena of Spanish politics.

The News concludes its article as follows: Considering all the circumstances which make it difficult for the Europeans to keep hold of their unwilling colonies in America, and reflecting that Cuba is now in insurrection, Spain will be fortuned.

The difficulties between the following and Victory of Evypt are the following.

and Viceroy of Expp, are in a fair way of settlement. Nearly all the represen-tatives of powers at Constantinople urged the Sublime Porte to a course of consultation and moderation

Abandoned. MADRID, August 6.

yesterday rumors were in circulation that the negroes were very much excited, defact and threatening, and meant to burn the Democratic candidate for Congress, Col. Mann, in effigy. Several citizens called on the Mayor and some of the leaders and advised them that it would be better to postpone the meeting, for if the effigy threat was a carried out the white people could not be restrained from an attempt to resent the indignity by force. It was thought that these representations had had the desired effect and that there would be a no meeting. At 8 o'clock, however, the tar barrels were lighted and the negroes began to flock in until they swelled into a crowd of ri,000 or 1,500. Many came withgans and almost all with concealed arms, pistols, knives andrayers. Nothing oc.

1,000 or 1,500. Many came withighns and almost all with concealed arms, pistols, knives andrazors. Nothing occurred except the inflammatory talk of some of the speakers until 10 o'clock when a jocose dispute between two citizens, on a subject entirely lorelgn to politics or the meeting, attracted some attention, and in pressing up to see what it was about, a white accidentally trod on the foot of a negro. Just as the altercation about this was settled, a pistol shot was heard. This was a signal for general firing, and the whole crowd dispersed immediately. The fire was continued a few momentas at he crowd scattered, and in ten minutes a dead quiet reigned, broken only by the tread of white patrols. A detachment of United States troops was stationed at the guard house at the request of the Mayor, in anticipation of trouble,—They took no part in the affray except to march up town to look after and put a stop to the firing. It is not known who fired the first shot. There were not over 100 men as lookers on at the meeting. The casualties were small considering.

100 men as lookers on at the meeting. The casualties were small considering the number of shots fired at close quarters. Many shots must have been tired in the sir. Three negroes were killed outright and five wounded. Four police officers and three other

Interest in every case.

The central line of the eclipse will commence at sunrise in west longitude 165½ degrees from Washington, and north latitude 52 degrees 42 minutes. This point islie in Russian Asia, (Siberia). From this beginning, the line will curve to the northeast, through Behring's sea, touching the northern coast of St. Lawrence Island, pass eastward up the middle of Norton Sound, and attike the coast of the United States in north latitude 63 degrees 43 minutes, and some 520 miles north of the extremity of the Alaskan Peningula. Thence it will pass inland, running about 40 miles north of Mount St. Ellas; thence nearly southeast across

periges of uncommon proximity, and during the eclipse she reached the as-cending node of her orbit. Under these

central luminary, since it is only during such a phenomenon that solar emanations at right angles to the line of vision are unabstructed by direct rays. It is, however, to be regretted that, for reasons which need not here be stated, the English expedition failed to throw any new light on the question of the constitution of the sun. The best photographs of the eclipse were made by Dr. Fritach and bis associates at Aden, where the time of totality was much shorter than at the stations in India.

In these pictures two separate ranges of York on Thursday, between two seashorter than at the stations in India. In these pictures two separate ranges of violet colored prominences, each embracing about one-sixth of the moon's circumferance, were represented, while on the opposite side was abown the peculiar hook shaped projection, the hight of which is estimated at almost one-fourteenth of the sun's diameter, or about 60,000 miles: Dr. Janssen, the head of the Franch expedition, reported

the present a large representation of the press will attend.

—A report has been received at Augusta, Georgia, that Charies and J. D. Creswell, who left that city on Wednesday, went to Edgefield, South Carolina, and fought a duel near there on Thuraday morning. They fought with pistois. The former was instantly killed and the latter seriously if not mortally wounded. The affair was entirely of a private nature and is alleged to have grown out of family matters. A later dispatch says: 'It seems J. D. Creswell was not killed in a duel, as reported. He was charged with the seduction of a young lady in South Carolina, and while on his way home, accompanied by his brother Charles, was met by friends of the lady and shot. The partless who did the shoultness reported. friends of the lady and shot. The par-ties who did the shooting are not posi-tively known.

—Among the documents presented to the Superior Court of Chicago, Thursday, was an amended bill, filed by Rev. Mr. Cheney's counsel. This bill is intended to meet the exigency presented by the answer to the original bill, which carried the proceedings of the ecclesiastical body to the morning of the 221 of July, the original bill having closed with the adjournment of the first day's proceedings. By the supplemental bill a combitage and confederating clause is carried, and new parties are the Bishop and the presenter. Accompanying this bill is a correspondence between Bishop Whitehouse and Mr. Cheney. Bishop Whitehouse, in his letter to Mr. Cheney, assumes that the offense and misconduct for which he was to be tried, had been unreservedly admitted by Mr. Cheney. This Mr. Cheney. This Mr. Cheney. This Mr. Cheney. -Among the documents presented to

offense and misconduct for which he was to be tried, had been unreservedly admitted by Mr. Cheney. This Mr. Cheney emphatically denies, and his denial is sustained by his wife and Mrs. A. Louisa Sheddon, who were in an adjoining room when the interview between the Bishop and Mr. Cheney occurred, and heard Mr. Cheney say in a loud voice: 'Bishop, I admit nothing.'

—A Richmond, Va., dispatch says that Sheriff Mayhew and his deputy, Stevens, of Norfolk, paid a recent visit to Mr. Taylor's farm, in that county, for the purpose of serving a writ of ejectment on negro squatters there. They, went down in a buggy, and coming to the village, left the horse and vehicle in the road.—They passed through the different streets and avenues, leaving the notices in every house, and when they returned to their buggy, were astonished to find the buggy, horse and harness decorated all over with the notices they had just served. On inquiring into the cause of this, the negroes informed them that no attention would be paid to these notices; that the military would have to remove them. They offered no the evening.

The moon's shadow will sweep over this line at the rate of about 2,220 mil sper hour. The shadow all be nearly circular; its semi-diameter at the distance of 80 degrees west from Vashington will be 79½ English miles.

The United States Naval Department at Washington has issued a list of cities and towns in the States near which the central line of totality will run, among which the following are the principle places: Leasburg, Lexington and Boon, North Carolina; Biounts-ville and Union, Tenn.; Estilville and Bristol, Va.; Louisville, Ky.; Maysville, Ind.; Springfield, Ill.; and Burtington and Des Molnes, Iowa.

A total collaps of the sun, visible in Southern Asia on the 18th of August, 1888, was observed by the Prussian expedition at Aden, Arabia, and by the French and English physicists at apoints much further east; in India. The period of totality was unusually long, for the moon had just passed a periges of the sun's disk; and the period of uncommon proximity, and live passed through the uniform the price of the sun's rays without any shade, Instances are not at all uncommon in which people have lost the buggy, horse and harness decorated all over with the notices they had just served. On inquiring into the cause of this, the negroes informed them that no attention would be paid to these notices; that the military would shave to remove them. They offered no violence to the officers, but assured them that no cities they be and them that no attention would be paid to these notices; that the military would be paid to the sense of this, the negroes informed them that no attention would be paid to these notices; that the military would shave to remove them. They offered no violence to the officers, but assured them that no attention would be paid to the sense of this, the negroes informed them that no attention would be paid to the sense of this, the negroes informed them that no attention would be paid to the sense of this, the negroes informed them that no attention would be paid to the sense of t

THE young lady of seventeen summers is no longer the object of Commodora Vanderbitt's gushing affections. She has been supplanted by a widow of twenty, the most beautiful and fascinating of all Saratoga's charmers. The lovely lady has been observed, in the romantic walks of Congress Spring hanging with iond affection on the arm of the Central magnate, who poured sweet strains in her ear, and referred with contempt to the shallow love of his younger rivals. Madame Rumor authoritatively sanounces the parties

authoritatively announces the parties engaged. MEADVILLE rejoices in a ghost. He is the disembodied spirit of an engineer Is the disembodied spirit of an engineer named Sprague, who some time since was killed on the Atlantic and Great Western Railway. He makes bimself manifest by hovering about the place where his engine used to stand, and amuses bimself in the 'slient watches of the night,' by throwing brick bats at those who are compelled to pass the spot.

The Carlist Movement Virtually Nearly all the Carlist bands have lissolved and disappeared. The Car-lists are discouraged, and the move-ment is considered as dead.

Four police officers and three other white men were wounded.

The Register of this morning comments on the riot as follows: Lust night's work was done after our editorial of this morning was in grint. It is a sharp and quick commentary on the danger we forecast from the present aspect of affairs. It is a burning shame that this community owes it to itself to protect itself from a repetition. Where the blame lies there is no room for question. These deeds are the direct outflow of the maddened passion of the negroes, inflamed and lashed into fury by political harangues and private instigations of the foreign radicals in our midst. It is a question for the public to deelde how long these incendiaries shall be allowed to expose the peace of society and safely of women and children. We hope a public question.

mportant Cabinet Meeting Antict-NEW YORK, August 6.

Naw York, August 8.

The President and family left on the Mary Powell yesterday for Garrison's, where they are to be the guests of Secretary Fish.

The Spanish Minister is in this city, but his object has no direct connection with the seizure of the Spanish gunboats. He is waiting instructions from Madrid. The boats still remain under indictment, and more explicit instructions as to what is to be done with them will probably be received from Secretary Fish, to-day. Mr. Delamater, the contractor for building the gunboats, as anxious about the vessels as they will cost him \$6,500,000 in gold. Marshal Barlow says that the boats will not be permitted to leave their present positions until their character is changed or instructions received for their release.

Late Hawana letters give, from a Spanish standpoint, the rebel assault on Poerto Principe, and the repulse. At the latest mail advices the ill fortune of the insurgents continued. The force of Jordan. Mormol. Marcon and Figu.
